Children's World Ocean Day Saturday, June 5

STAR ECO Station, in partnership with the City's Stormwater Management Program, invites families to come to **Children's World Ocean Day** on Saturday, June 5, 2010 from 11:00 a.m. to 3:00 p.m. There will be all kinds of ocean-themed fun and games including fun science experiments, meet "Ellie" the ECO Station Whale, and get wet on the water slide! Come learn what you can do in Rocklin to help protect our local watersheds and

the deep ocean, too.

[Children's World Ocean Day - Printable Flyer](#)

Environmental activities include:

- o Watch "A Sea Change" documentary to learn about the acidification of the world's oceans
- o Adopt-an-Inlet in your neighborhood
- o Tour the ECO Station's permanent full-size storm drain exhibit
- o Watch the Weather Channel's "After the Storm" documentary to learn more about urban runoff and water quality
- o Sign up to collect or to adopt acorns in the fall
- o Donate pantyhose, tights, and clean, clipped human hair to make hair boons and hair mats to [help clean up the Gulf Oil Spill](#)
- o Register as a City volunteer to get advance notice of upcoming community service events

Know & Go

What: Children's World Ocean Day

When: Saturday, June 5, 2010

Time: 11:00 a.m. to 3:00 p.m.

Where: STAR ECO Station, 4465 Granite Drive, Rocklin

Admission: \$5 General; Children under 2 years old are free

If you have questions about Children's World Ocean Day please contact STAR ECO Station at 916.632.8347.

Special Recycling Events

Join the effort to keep Rocklin clean through participating in these special events and programs:

- Take advantage of Rocklin’s annual Christmas Tree Recycling program.
- Be a part of Rocklin’s quarterly Universal Waste Collection events for disposal of televisions, computers, batteries and other items.
- Participate in Rocklin’s annual Spring Clean Up Day and show your community pride.
- Bring your hazardous waste to the Household Hazardous Waste Facility at the Material Recovery Facility (MRF). For directions, contact the Western Placer Waste Management Authority.

Did You Know?

Just one quart of motor oil can pollute 250,000 gallons of water.

Report Illegal Dumping

Our inspectors and maintenance crews are on the look-out for possible illegal dumping into the city storm drain system. To report an incident of illegal dumping into a storm drain, call the

Public Works Department at (916) 625-5500 or click on the Access Rocklin link on our website at www.rocklin.ca.us.

Pollution Prevention For Residents

Where Storm Drains Go

The storm drain on your curbside does more than guzzle gutter water. It leads directly to our natural water system, including local creeks, ponds and streams.

Unlike household drains that route to a treatment plant, storm drains travel underground and funnel untreated water into our waterways. When that water is tainted by pollutants it creates stormwater pollution which seriously impacts our natural water resources.

What Pollutes Stormwater?

Stormwater pollution has many sources. Water from washing cars and over-watering lawns enters our storm drain system carrying detergents, pesticides, fertilizers and pet waste. Rainwater

innocently washes sediment, grease, dirt, motor oil and antifreeze from sidewalks, streets, driveways and parking lots. Stormwater pollution is also caused by illegal dumping, such as pouring paint or oil into storm drains. Thanks to the efforts of volunteers many citywide drain inlets are stenciled or stamped with “No Dumping, Flows to Waterways”.

Ways You Can Help

Never pour anything down a storm drain that you wouldn't want to swim in!

- Bag or compost yard waste.

- Bring leftover toxic materials such as paint, cleaners, used motor oil and pesticides to an authorized drop-off. For more information on where these materials can be disposed of, contact Western Placer Waste Management Authority.

- Never hose down spills into a storm drain. Use kitty litter or other absorbent material to clean toxic spills from pavement.

- Make it a practice to purchase non-toxic or less-toxic products for home and garden use.
- Use pesticides, herbicides and fertilizers sparingly to reduce run-off and don't apply them if it's windy or if rain is forecasted.

- Keep vehicle and equipment well maintained to avoid leaks.

- Keep yard clippings, detergent, trash and animal waste out of the gutter, storm drains and wetland areas. Rake or sweep sidewalks and driveways instead of hosing them down. Using a water hose forces debris and chemical residues into storm drains, which clogs gutters, causes street flooding and pollutes waterways.

- Take unwanted products to a local Household Hazardous Waste Collection Center or Event.

Rocklin Recycles

Keeping Rocklin and its waterways clean is a City priority. Working with Auburn Placer Disposal Service and the Western

Placer Waste Management Authority, Rocklin consistently exceeds the state's 50% mandated recycling requirement, even reaching the 65% rate.

In Rocklin, waste sorting occurs at the dump; therefore all residents recycle with no extra effort at home.

- **Efficiency:** Auburn Placer Disposal Service provides weekly garbage collection services throughout the city.
- **Simplicity:** Residents fill one Toter[®] with all household garbage (food waste, cans, bottles, newspapers, etc.) and another with yard clippings. Professionals at the Western Placer Waste Management Material Recovery Facility (MRF) capture the recyclable materials and compost the yard debris for resale and reuse. Cans, bottles, paper, cardboard, wood and other materials are diverted from the landfill and recycled.
- **Protecting the Environment:** New state regulations prohibit disposal of hazardous items such as fluorescent tubes, consumer batteries and mercury thermostats. These items as well as computer monitors, stereos and televisions can be disposed of at the MRF's Household Hazardous Waste Facility and at the city's quarterly universal waste collection events.
- **Spotless:** A portion of resident garbage fees go to providing street sweeping services to keep the city drains and gutters free of debris.

Disposing

- Improper disposal of hazardous products in our backyards, down the drain or in landfills is an issue of growing concern. Household hazardous products that are improperly used, stored or disposed of can enter groundwater and surface water supplies and be harmful to your health.
- There are several ways you can dispose of hazardous household products. Options include using the entire supply, recycling unused portions, taking unused supplies to a household collection event or donating unused supplies to a local group or organization that may have a need for them.
- For more information on Household Hazardous Waste disposal, contact the Western Placer Waste Management Authority Permanent HHW Facility or visit their website at www.wpwma.com.

Report Illegal Dumping

Our inspectors and maintenance crews are on the look-out for possible illegal dumping into the city storm drain system. To report an incident of illegal dumping into a storm drain, call the Public Works Department at (916) 625-5500 or click on the Access Rocklin link on our website at www.rocklin.ca.us.

Household Waste and Recycling

Common household products that contain hazardous materials pose a safety problem when used or disposed of incorrectly. It's important to follow a product's instructions for safe use. Improper handling of hazardous products may cause extreme danger to you, your family, your property, public workers, wildlife and the environment.

Products classified as "hazardous" have become so commonplace in most homes that we often don't realize they can be dangerous to use and dispose of. Read the product's label. Key words like DANGER, CAUTION, WARNING, FLAMMABLE, or POISON indicate the product is potentially hazardous and requires special attention.

Buying

- Read directions and all health warnings. If you have pets, make sure that product is safe to use around animals.
- Purchase child-resistant substances and packaging and buy only what you need.
- Try to find the least hazardous products.

Storing

Store products tightly in original containers so you can easily identify the contents and refer back to the labeled directions for proper usage if needed.

- Never mix chemicals as this may produce dangerous reactions.
- Regularly check containers for wear and tear and possible leakage.
- Store materials in a cool, dark place.
- Separate incompatible products; keep liquids away from fertilizers.
- Limit the amount of chemicals stored and eliminate unused or unneeded supplies.
- Keep all household chemical products out of sight and reach of children.

Using

- Always read and follow the directions. Some products should not be used in confined spaces, others should not be used without gloves or eye protection to avoid physical contact.
- Use only the amount indicated and avoid splashing.

- Many chemical accidents are the result of trying to improve the way a product works by adding one substance to another. Avoid mixing common household chemical products as some combinations, such as ammonia and bleach, can create toxic gases.
- Take breaks frequently for fresh air and never smoke while using any household chemical.

Did You Know?

You can use non-hazardous materials for use in many cleaning and stain removal tasks. These products include baking soda, cornstarch, lemon juice, soap and water, steel wool and vinegar - just to name a few.

License Your Dog, Scoop The Poop!

The City of Rocklin, in partnership with the California Department of Conservation and Rocklin Family Pet Shop, is making it easier than ever to pick up after your pet.

Simply license your dog (new or renewal) and you will receive a Bags on Board pet waste bag canister and one refill (one canister and refill for each license). For more information on dog licensing go to www.rocklin.ca.us/DogLicense. Bags on Board is a convenient way to always have a bio-degradable bag on hand when you're out and about with your pet. The canisters attach to leashes, collars, purses, whatever so you never have a reason not to Scoop the Poop!

Funding for the Bags on Board canisters was provided through a grant from the Department of Conservation and the refills were donated to the City's Storm Water Management Program by Rocklin Family Pet Shop.

Scoop the Poop!

City of Rocklin

A Doggone Good Idea

Whenever you think of water pollution, you probably don't think of your pet. However,

if pet wastes are disposed of incorrectly, they can cause water pollution.

Although each household only generates a small amount of pet waste, these small amounts can add up to a big water quality problem.

Droppings from dogs, cats and other commonly kept animals including exotic birds and rabbits can cause two kinds of problems.

First, pet wastes contain nutrients that can promote the growth of algae if they enter streams and the ocean. Algal blooms change the color of streams and the ocean so you don't want to swim in the water. Algae can also clog streams and destroy habitat for aquatic organisms, such as fish.

Second, animal droppings are a source of pests and disease. Pets, children playing outside, and adults gardening are most at risk for infection from some of the bacteria and parasites found in pet waste.

The following are some ways pet owners can help prevent pollution.

- Pick up after your pet every time; don't leave pet waste on a sidewalk, street, or driveway where it can be washed into storm drains. Most pet supply stores carry products that make pick up easy.
- Clean up waste in areas near water bodies, ditches and storm drains.
- Don't allow pet waste to accumulate in pens.

- Dispose of pet waste in the garbage or flush it down the toilet. Never wash it into the gutter or down a storm drain.

- Carry extra bags in your car so you're prepared when traveling with your pet.
- Get involved in a pet group and remind others to pick up after their pets.

Did You Know?

More than half of all U.S. households own a dog, cat, or other pet.

Don't...

- ◆ Discharge pool or spa water during rainy conditions when the ground is already saturated.
- ◆ Clean diatomaceous earth (DE) filters, as the DE inside the filter cartridge is carcinogenic. Used cartridges should be treated as hazardous waste and disposed of accordingly.
- ◆ Keep in mind that many pool chemicals and cartridges are hazardous waste when discarded. Contact Western Placer Waste Management Authority at 916-645-5230 for more information on how to dispose of these chemicals properly.

Water from residential pools and hot tubs is not considered storm water and should not be discharged directly to storm drains.

Did You Know?
The average in-ground swimming pool holds 20,000 gallons of water.

Report Illegal Dumping

Our inspectors and maintenance crews are on the look-out for possible illegal dumping into the city storm drain system. To report an incident of illegal dumping into a storm drain, call the Public Works Department at (916) 625-5500 or click on the Access Rocklin link on our website at www.rocklin.ca.us.

Discharging Pool & Spa Water

Need To Drain Your Pool or Spa?

If you have a swimming pool, fountain or spa, you can help prevent water pollution by properly discharging the water when you need to drain it.

Improper disposal of pool water into a storm drain is harmful to the environment because it enters the storm drain system untreated.

Pool water may contain copper, chlorine, and filter backwash that can harm local creeks, ponds and streams and the wildlife that live there.

Following are some dos and don'ts for proper pool water discharge.

Do...

- Neutralize your pool water prior to discharge to the storm drain by adding a chemical dechlorinator (available from pool supply stores) or by letting the water decrease on its own to a pH level between 7.2 and 7.8.

- Let the water filter over a grassy or landscaped area on its way to the storm drain.

Grassy areas and flower beds help filter pool water before it reaches the storm drain.

Do...

- Use copper algaecides only when necessary, such as when less toxic algae control products are ineffective.

- Discharge pool water to the storm drain only if you know it doesn't contain harmful concentrations of chlorine and copper. A pool maintenance company, pool supply store or local analytical laboratory can help you determine the concentration of chlorine and copper in your pool.

- Be sure to call the City's Public Works Inspector before discharging water to a street, gutter, or storm drain. Filtration or diversion through a basin, tank or sediment trap may be required. In areas of known contamination, testing is required prior to reuse or discharge of ground water. Consult with the Public Works Inspector to determine what testing to do and to interpret results. Contaminated ground water must be treated or hauled off-site for proper disposal.

- Maintain the proper chemical balance and filtration in your pool. This will minimize the need to drain the pool and prevent unnecessary corrosion of copper pipes and equipment.

- Dispose of wastewater from washing cartridge filters in a dirt area, never into the street, paved driveways, or a street drain.

Do...

- Be sure your pool maintenance service follows all discharge requirements.
- Be considerate of your neighbors by keeping all the water on your property. If necessary, use sandbags or berms if to keep water from leaving your property.

Don't...

- Discharge pool or spa water to the sanitary sewer system.
- Drain your pool or spa water if there has been a recent application of herbicides, pesticides or fertilizers.
- Discharge pool water containing copper to the storm drain. Copper in your pool can come from some algae control products and copper plumbing and equipment, particularly heaters. Typical recommended dosages for copper algaecides are about 100 times higher than other concentrations that are toxic to many aquatic organisms.

- Discharge swimming pool water containing chlorine at levels higher than 0.01 parts per million (ppm) to the storm drain. Chlorine levels higher than 0.01 ppm are harmful to aquatic organisms. The typical chlorine level maintained in a swimming pool is 2 – 4 ppm.

Getting Started

The City of Rocklin encourages the use of managed grazing for fuel load reduction and suppressing noxious weeds. With a grazing permit from the Rocklin Fire Department, the services of a professional grazing contractor can be used in lieu of, or in addition to, other weed abatement methods on your property. While a permit is required for anyone using grazing animals in Rocklin, they're available at no charge from the Fire Department.

Permit applications can be picked up at Fire Station 1, 4060 Rocklin Road, or they can be downloaded from the City's website at www.rocklin.ca.us/grazing. If you'd like to have an application mailed to you, call the Fire Department at (916) 625-5300.

Included in the application packet is a list of area grazing contractors, as well as a list of things property owners should consider before engaging a contractor. These documents can also be downloaded from the City's website at www.rocklin.ca.us/grazing.

Did You Know?

The indentations left in the soil by animal hooves are ideal catchments for native plant seeds to take hold and grow.

Managed Grazing

Report Illegal Dumping

Our inspectors and maintenance crews are on the look-out for possible illegal dumping into the city storm drain system. To report an incident of illegal dumping into a storm drain, call the

Managed Grazing

Anyone living in California knows how easily wildfire can devastate a community. One of the many responsibilities a property owner has is to minimize fire hazard by controlling excess vegetation on their property.

The methods most commonly used to control vegetation are manual/mechanical (hand or machine removal) and chemical (using herbicides).

Both methods can be effective when properly applied, at least in areas that are accessible with equipment.

Another approach to vegetation management is biological. Grazing has been around for years, but environmental concerns, accessibility, cost, and losses due to wildfires in California are contributing to its growing popularity. In fact, many local and state

government agencies are now using managed grazing to reduce fire hazard and control vegetation on public lands.

Managed grazing may not be appropriate for every situation, but when done properly, it's an effective, eco-friendly alternative that should be considered when deciding the best method to use for your property.

Benefits of Managed Grazing

One of the most obvious benefits of grazing is the reduction of fire hazard.

Especially dangerous are ladder fuels. Ladder fuels are dead vegetation (tall grasses, shrubs, and

low hanging tree branches) that allow a ground fire to climb up into the tree canopy. Managed grazing is a very effective way to reduce fire fuel loads because goats and sheep love grasses, clovers, weeds and brush species such as Manzanita, berry bushes, poison oak and even starthistle.

Being such good climbers, goats prune lower tree branches, which helps to keep fire from spreading from the ground level into the tree canopy. Goats and sheep are often used together to graze areas that have a combination of grassland and woody vegetation.

Goats are very athletic and are excellent climbers.

Environmental Benefits

Properly managed grazing has many environmental benefits, including:

- Watershed Health & Protection
- Wildlife Habitat
- Habitat for Endangered & Threatened Species
- Sequestered Carbon from the Air
- Ground Water Recharge
- Wildfire Reduction
- Soil and Plant Health
- Eradication of Invasive Plant Species

Invasive Plant Species

Invasive species can impact the growth of native vegetation by depriving it of water and nutrients. Some invasive species grow tall enough to completely shade out

the surrounding vegetation. Over time, grazing helps control the composition and growth rate of invasive plants, reducing them significantly.

Find Out More

To learn more about managed grazing and its benefits or to get a grazing permit, visit the City of Rocklin's website at www.rocklin.ca.us/grazing.

Scoop 🐾 the 🐾 Poop!

For cleaner creeks and streams...
please pick up after your pet

License your
dog and get a
FREE
pet waste
disposal
canister!

In Rocklin,
every dog
needs a
license.

The City of Rocklin makes it easy for dog owners to license their dog and pick up pet waste. Start the license paperwork online at <http://www.rocklin.ca.us/doglicense>, then mail it in or drop it off at the Police Station.

When you license your dog, you get a free Bags on Board pet waste canister that can go wherever your dog goes. With Bags on Board on a leash or even a collar you can Scoop the Poop every time!

Bags on Board canisters provided through a partnership with California Department of Conservation. Refills provided courtesy of

Rocklin Family Pet Shop

Scout troops, classrooms, religious and service groups,
families, and businesses

The City of Rocklin's
Storm Water
Management Program

Invites YOU
to

Adopt-an-Inlet

You can help keep Rocklin's creeks, streams,
and open space clean and healthy!

Volunteer to mark, monitor, and maintain a storm drain inlet in your
neighborhood, near your business or school.

The City will supply you or your group with safety equipment. In return,
you are asked to periodically report your activities.

Contact Dara Dungworth or Lydia Sizelove at (916) 625-5500
to get more info or request an adoption packet.

Brought to you
by your friendly
Department of
Public Works

ADOPT-AN-INLET AGREEMENT

Name of Adopting Organization/Group/Individual

Location or nearest address of adopted inlet

Terms of Agreement

The ADOPTER agrees to:

- Clean debris from around the inlet: weekly bi-monthly monthly
- Monitor the inlet: weekly bi-monthly monthly
- Report illicit dumping, large debris, and/or blockage and flooding **immediately**
 - Call Public Works (916) 625-5500 Monday-Thursday 7:30-4 (City offices are closed Fridays)
 - Police non-emergency dispatch (916) 625-5400 after hours
 - Online at Public Works [Report a Problem](#) webpage
- Perform above agreed to tasks for a period of 12 months
- Ensure that all volunteers have read and will follow the 'Volunteer Guidelines' provided. Use common sense and, if in doubt, stop and contact the City as noted above.
- Ensure that all volunteers have provided a completed/signed 'Volunteer Participation Agreement' before they perform any work.
- Notify your City of Rocklin Staff contact, in advance when possible, if you need assistance.
- Every 3 months (quarterly) provide the City with a monitoring and maintenance report.
- Dispose of debris properly.

The CITY agrees to:

- Assist the ADOPTER with questions and provide general support in a timely manner.
- Dispatch City Staff to respond to illicit dumping, blockage, and flooding and to help remove large debris, as deemed necessary.

The City of Rocklin reserves the right to terminate this Agreement at any time for cause such as not fulfilling Agreement Terms, misuse of City property, etc., or for no cause.

ADOPT-AN-INLET VOLUNTEER PROGRAM & GUIDELINES

Thank you for your interest in the City of Rocklin's Adopt-an-Inlet Program. The City of Rocklin's Public Works Department, in partnership with our community, provides an opportunity for individuals, families, neighborhood groups, school classes, civic organizations, employee groups, and local businesses to play an active role in maintaining the City's storm water system and the creeks, streams, and open space areas into which it flows.

The commitment to adopt a storm drain inlet involves the monitoring of the inlet and nearby gutters that drain into it, simple maintenance of the exterior of the inlet and nearby gutters, and providing periodic brief reports to the City for a specified period of time.

Please carefully review the attached Adopt-an-Inlet Request Form, Adopt-an-Inlet Agreement, Adopt-an-Inlet Volunteer Reporting Form, and Volunteer Participation Agreement. Also, *the contact person and every member of a group must read and follow the Guidelines below as part of the Agreement.* If you or your group choose to help keep our community cleaner return *only* the Request Form by mail or fax to Public Works and a Staff member will call you to discuss completing the rest of the forms and the "adoption process."

Inlet Maintenance Guidelines

- NEVER REMOVE THE INLET GRATE. If large debris or other objects need to be removed from the underground area of the storm drain, call Public Works at 625-5500, during business hours (M-Th, 7:30 to 4). Outside of business hours, if the problem appears to be an emergency call Police dispatch at 625-5400.
- NEVER TOUCH HAZARDOUS WASTE (including weapons, medical waste, or anything you think might be unsafe to handle or remove).
- Call Public Works, 625-5500, or after hours Police dispatch, 625-5400, for assistance with any type of hazardous waste found near or in the storm drain inlet.
- Wear the bright reflective work vest provided by the City so motorists and cyclists can see you more easily.
- Wear the work gloves provided by the City.
- Stay on the sidewalk as much as possible when removing debris from the gutters and/or exterior of the inlet.
- Always handle tools responsibly and use the right tool for the right job.
- Adopter's primary contact person should call your City Staff contact directly or Public Works with any questions.
- The Adopter agrees to complete and return an Adopt-an-Inlet Volunteer Reporting Form to document on a quarterly basis the monitoring and maintenance performed and to immediately report any incidence(s) of illicit dumping.

Public Works

Illicit Discharge and Detection Program

ADOPT-AN-INLET VOLUNTEER REPORTING FORM

Please complete the top part of this form and return it to your City Contact. Your report will be reviewed by Public Works Staff and will be added to the City's Illicit Discharge and Detection database. If you have any questions please call (916) 625-5500.

**CITY OF ROCKLIN
VOLUNTEER PARTICIPATION AGREEMENT
ADOPT AN INLET PROGRAM**

Name _____

Address _____

Phone _____

E-Mail Address _____

I agree to serve as a volunteer as follows:

Event/Assignment: _____

Name of Department: _____

Time Period: _____ to _____
(Date) (Date)

I agree:

1. To perform the tasks of my Volunteer Assignment as described to me to the best of my ability **and that are within my physical capability and will not undertake tasks that are beyond my ability**
2. To report to work on time as scheduled, and if unable to report, to call my supervisor;
3. Not to participate if under the influence of alcohol or any drug that could impair my physical or mental ability;
4. To work under the supervision provided by the City;
5. To observe the same rules and policies as paid staff;
6. To keep confidential all information/names and identifying facts regarding materials I am working with as a volunteer;
7. To contact the City Volunteer Coordinator when:
a.) A problem arises and I am unable to contact my supervisor; b.) I feel a change needs to be made in my assignment;
c) My address, phone, emergency contact or name changes; and d) Additional information on training or assignment needs to be recorded in my file.
8. To refrain from any type of solicitation among staff or citizens;
9. To avoid restricted areas unless I am requested to enter with my supervisor;
10. To use City equipment such as telephones, typewriters, copy machines, computers, etc., for performing City duties and not for personal use;
11. To only use machinery, equipment or tools with which I am familiar and know how to operate safely;
12. To observe all safety rules and use care in the performance of my assignments;
13. To perform my assigned tasks and to conduct myself in a manner which is a credit to me; which benefits the City of Rocklin, its citizens, its employees, and its volunteers; and which helps the City of Rocklin achieve its goals and objectives;
14. To give my supervisor adequate notice before terminating my volunteer assignment.
15. To hereby grant to the City of Rocklin the absolute and irrevocable right and permission to use, reuse, and publish all pictures of me or my child taken in the course of City of Rocklin business. I fully understand that I hold no control over the use of the image of which I or my child is a part. Further, I grant to the City of Rocklin, and those who the City assigns, the right to use me or my child's name if necessary. I hereby release the City of Rocklin from any and all claims and demands arising out of, or in connection with the use of the photograph, including any claims of libel. This authorization and release shall also apply to those working with or in connection with the City of Rocklin as well as the person(s) who took the photograph. I have fully read the foregoing and completely understand the contents.

I agree that, upon written notice to me, the City Volunteer Coordinator may terminate my Volunteer Assignment for any cause or no cause.

I certify that I understand the description of the Volunteer Assignment and potential hazards/risks for this assignment. I further certify that I have voluntarily applied to participate in performing the assignment with the knowledge that there is some risk that I may be injured in the course of performing these services.

I further certify that I am capable of performing these services and know of no physical condition which would preclude the safe performance of those services. If I cannot complete the project or otherwise meet my commitment, I will notify my supervisor immediately.

I certify that I am not an employee of the City of Rocklin.

I have been advised that, by resolution of the City Council, City has extended its worker's compensation coverage to volunteers, and I agree to accept that coverage. I understand that, under worker's compensation laws, worker's compensation benefits will be the sole and exclusive remedy if I am injured while engaged in or performing these volunteer services.

With the exception of worker's compensation benefits as set out above, I hereby agree that I, my heirs, guardians, legal representatives and/or assigns will not make a claim against, or file an action against, the City of Rocklin or any of its agents, officers, or employees for injury or damage resulting from negligence, howsoever cause, by any employee, agent, or officer of the City of Rocklin as a result of my participation in this volunteer activity or service. In addition, I hereby release and discharge the City of Rocklin, its agents, officers, and employees from all actions, claims, and demands that I, my heirs, guardians, legal representatives and/or assigns now have or may hereafter have for injury or damage resulting from my participation in these volunteer activities or services.

I further acknowledge that the City is not required to indemnify me against a claim for punitive damages except as authorized by the City Council pursuant to Government Code Section 825(b). I agree to defend and indemnify the City in any claim or action arising from my actions that are outside the scope of my volunteer duties. I acknowledge that loss or damage of personal property used while providing volunteer services is not reimbursable under City regulations.

I have carefully read this agreement and fully understand its content. I am aware that this is a partial release of liability and a contract between myself and the City of Rocklin and sign it of my own free will.

Storm Water Vocabulary Words

Habitat—the place or environment in which an animal lives

Natural Resources—land, forests, water

Outfall—the underground storm water pipe that brings runoff water into a creek or an open space area

Sanitary Sewer—the system of underground pipes that take wastewater from houses and businesses to a water treatment plant

Storm Drain Inlet—the grate in the gutter or ground that allows runoff water to go into the storm drain system of pipes and out through the outfall

Watershed—the region or area drained by a river or stream

Thank you for helping to care for Rocklin's creeks and streams!

Scout troop adopts storm drain inlet

By Lauren Weber, The Placer Herald

Lauren Weber/ The Placer Herald

Boy Scout Troop 440 is the first to be part of the city's Adopt-an-Inlet program, designed to help decrease pollution into Rocklin's storm drains. Pictured are city councilman Brett Storey, left, Kim Borum of STAR ECO Station, Scout Hunter Boberg, Dara Dungworth, Scout Reed Dayton, Scout Spencer Matthews, Lydia Sizelove and Vice Mayor Scott Yuill.

A group of Rocklin Scouts is the first to take a proactive role in keeping the city's storm drain inlets clean.

Through a partnership with the city of Rocklin's public works department and STAR ECO Station, an educational program and wildlife rescue facility, individuals, groups, families and classrooms have the opportunity to prevent drain pollution in the inlets.

Boy Scout Troop 440, a group of 11-year-olds, has become the first group to adopt an inlet as part of their community service requirements to move up the ladder to become Eagle Scouts.

The troop will monitor the inlets monthly and bimonthly, looking for debris such as leaves and litter.

According to Dara Dungworth, associate planner/ storm water coordinator with the city's planning division, people can monitor the drains as frequent as they want.

"It's really up to people to decide what level of participation they want to bring to it," she said.

Saturday, a ceremony was held at STAR ECO Station, thanking the Scouts for their help.

"These kids, they're taking ownership of their neighborhood," said Rocklin Vice Mayor Scott Yuill. "The city has gone through a lot of budget cuts ... this couldn't be more timely."

Scouts Reed Dayton and Hunter Boberg said they remembered visiting STAR ECO Station in school and thought it would be nice to help the station. In addition to adopting and monitoring a group of storm drains, they went door to door collecting donations and used batteries for recycling – the end result was two boxes full of batteries and a \$400 check to STAR ECO Station, as well as two donated aquarium tanks.

"We do what we can," said Scout Master Lyman Dayton.

Almost four months ago, STAR ECO Station unveiled its storm drain exhibit showing visitors that debris and trash that goes down storm drains, makes its way to the ocean. Through Adopt-an-Inlet, the groups are trying to bring awareness to Rocklin residents to keep inlets clean.

If you're interested in adopting an inlet, contact Dara Dungworth or Lydia Sizelove at 625-5500.

What you should do if you see someone dumping in the storm drains:

Go online to Rocklin.ca.us and fill out a report at Access Rocklin

Call the city's public works department at 625-5500

For large spills/ dumps, call police dispatch at 625-5400 for non-emergency, and they will clean up the hazardous material

Contact Lauren Weber at laurenw@goldcountrymedia.com.

OFFICIAL

Storm Drain Inlet Adoption Certificate

The City of Rocklin hereby confers the status of Storm Drain Adopters upon

Jackson's Giant Jackrabbits at Breen Elementary

Furthermore, the City recognizes that the Jackrabbits have pledged to learn about the watersheds in Rocklin and help them to be as healthy as possible.

In addition, the City is grateful for the assistance the Jackrabbits will provide by reporting any flooding and/or illegal dumping to the City of Rocklin Public Works Department.

Moreover, the City is also grateful for the Jackrabbits' assistance with monitoring and maintaining their adopted storm drain inlets on the Breen Elementary school grounds.

The Jackrabbits' efforts are vital to ensuring the City's storm drain system and creeks are as healthy and clean as possible.

URBAN FOREST PLAN DISCUSSION

Urban Forest Stewardship. In October 2006, the City Council adopted the City's Urban Tree Plan. The stewardship of the City's urban forest through protection and maintenance has many benefits; among these benefits is the role of trees in the watershed. The complete plan can be downloaded from the City's website at: http://www.rocklin.ca.us/government/development/planning/publications_n_maps/default.asp.

This document provides an overall framework for managing Rocklin's urban and natural forest resources. It is based on the condition of the forest in 2003 and an analysis of trends that have shaped Rocklin's urban forest to date and will continue to influence it in the future. The major portions of this document include a management plan for Rocklin's urban forest. The management plan presents community-based goals for managing and protecting Rocklin's tree resources. Major goals of the plan include:

- Promoting conservation of existing tree resources.
- Developing an urban forest canopy that is stable over the long term
- Promoting efficient and cost-effective management of publicly-owned urban and natural forest resources.
- Fostering community support for the local urban forestry program and encouraging good tree management on privately-owned properties.

The plan also presents the results of surveys and other evaluations of Rocklin's urban forest. The information is organized into six subject areas:

- **Overall tree canopy changes from 1952 to 2002** - The increase in canopy cover over this time is largely due to growth of conserved oaks and new tree plantings, primarily in residential developments.

- **Oak woodland open space lands** - The City-owned oak woodlands include both riparian and upland stands, which differ with respect to management issues. Current tree condition is generally good, but regeneration is an issue in upland stands while invasive species are a bigger concern in riparian areas.
- **Trees in parks** - Most planted park trees are in good condition, but conserved oaks in some older parks are declining. Pruning to improve tree structure is the most common maintenance need.
- **City-maintained parkway trees** - In 2004, the City maintained an estimated 10,000 trees along about 28 miles of streets. Most of these trees were in good condition but were generally young. Maintenance needs and costs will rise as the tree population ages.
- **Private trees along residential streets** – Private trees constitute the overwhelming majority of trees along Rocklin streets, although most are planted too far from the street to shade pavement. Most of the private tree population is relatively young and healthy, but many conserved oaks are in decline.
- **Trees in commercial parking lots** - Levels of tree shade in most parking lots is low, with very few spaces being even half shaded. Although trees were young in many lots, older lots did not necessarily have higher levels of shading due to the loss of planted trees over time.

Involving residents in the care of Rocklin's urban forest. City residents play a major role in the planting and maintaining the majority of Rocklin's urban forest. Through public education and outreach programs, the City can help improve the selection and care of trees on residential properties and can increase the involvement of community volunteers in the restoration of native oak woodlands on City lands.
