1 EXECUTIVE SUMMARY

A Phase I Environmental Site Assessment (ESA) was conducted for the property located at the southeast corner of Rocklin Road and Sierra College Boulevard in Rocklin, Placer County, California (subject property). The property consists of approximately 10 acres of land situated on Assessor's Parcel Numbers (APNs) 045-161-014, 045-161-015 and 045-161-016 (Figures 1 and 2). The subject property is currently undeveloped.

The findings of this investigation are based on a review of historical source information, a search of regulatory agency databases within specified distances, review of available local agency records, interviews, and a site reconnaissance.

Information gathered for this report indicated the following:

- The subject property has been primarily undeveloped. Sometime between 1957 and 1966 a small structure was present northwest on the subject property and sometime between 1972 and 1984 the small structure was no longer present on the subject property. The subject property is currently undeveloped;
- Adjacent and nearby properties have included undeveloped land, residential housing, a college and a shopping center;
- A natural gas pipeline operated by Pacific Gas & Electric Company runs along the norther border of the site; and
- Based on the documents reviewed, site inspection, and brief visual observation of neighboring properties, it is unlikely that adjacent or nearby properties have impacted the environmental conditions at the subject property.

Dudek performed this Phase I ESA of the subject property in conformance with the scope and limitations of ASTM Practice E1527-13. This report summarizes the research and findings of the Phase I ESA. This assessment revealed no evidence of RECs in connection with the subject property.

2 INTRODUCTION

This Phase I ESA was performed according to the guidelines stipulated in the American Society for Testing and Materials (ASTM) Standard E1527-13, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process." This Phase I ESA was conducted as part of environmental due diligence for development of residences on the subject property.

2.1 Assessment Procedure and Scope of Investigation

Phase I ESAs assist in identifying past and present land use, including identification of possible releases or disposal of manufacturing or other wastes if such information is contained within regulatory reports or files, and/or is currently visible onsite. The assessment reviews local, county, state, and U.S. Environmental Protection Agency lists of known or potentially hazardous waste sites, landfills, and sites currently under investigation for environmental violations that may be of concern to a site.

The scope of this environmental investigation consisted of (1) a reconnaissance of the subject property; (2) a search of regulatory agency records; (3) review of available historical aerial photographs, topographic maps, Sanborn fire insurance maps, City Directory listings, and building department records; (4) interview of a representative of the property owner; and (5) preparation of this Phase I ESA report detailing the findings of the investigation.

These activities were conducted to identify recognized environmental conditions. The term "recognized environmental condition" means the presence or likely presence of any hazardous substances or petroleum products on the subject property under conditions that indicate an existing release, a past release, or a material threat of a release into the ground, groundwater, or surface water.

The term "controlled recognized environmental condition" (controlled REC) is an environmental condition that would have been considered a recognized environmental condition in the past, but which has been remediated and received risk-based closure by a regulatory agency (i.e., no further action letter) where residual contamination remains in place. Furthermore, "controlled REC" is used if the property is subject to a control or use restriction (i.e., property use restrictions, activity and use limitations, institutional controls, or engineering controls) due to residual onsite contamination.

The term "historical recognized environmental condition" (historical REC) is an environmental condition that would have been considered a recognized environmental condition in the past,

but which has been remediated and received unrestricted residential use closure by the regulatory agency. Therefore, no controls or use restrictions have been applied to the property.

The term "recognized environmental condition" is not intended to include *de minimus* conditions. *De minimus* conditions are conditions that generally do not present a material risk of harm to public health or the environment and would not be the subject of an enforcement action if brought to the attention of governmental agencies.

2.2 Qualifications of Environmental Professionals

This Phase I ESA was prepared by Keith Blackmon, geologist; and Glenna McMahon, professional engineer. Qualifications for Mr. Blackmon and Ms. McMahon are presented in Appendix A.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in Section 312.10 of 40 Code of Federal Regulations (CFR) 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312.

3 SITE LOCATION

The subject property consists of approximately 10 acres of land located at the southeast corner of Rocklin Road and Sierra College Boulevard in Rocklin, Placer County, California. APNs 045-161-014, 045-161-015 and 045-161-016 comprise the subject property (Figure 2). The subject property is currently undeveloped. The subject property is bordered by Sierra College Boulevard to the west followed by a shopping center, Rocklin Road to the north followed by vacant land, Sierra College to the northwest, Rocklin Manor (residences) to the east, Water Lily Lane to the south and residential properties to the south and west.

4 ENVIRONMENTAL SETTING

The subject property is located west of the Sierra Nevada Mountain range, northwest of Folsom Lake. The geologic setting in the general area is primarily comprised of Mesozoic era granitic intrusive rocks.

General topographic information for the subject property and the surrounding area was obtained from a review of topographic maps, from the Environmental Data Resources (EDR) report (Appendix B), and from a site visit. The topography of the subject property is relatively flat with a gradual overall west-southwest slope, towards Sierra College Boulevard. The elevation of the subject property is approximately 350 feet above mean sea level.

No subsurface geologic investigations were performed as part of this Phase I ESA. According to the U.S. Department of Agriculture (USDA) Natural Cooperative Soil Survey (NCSS), the subject property is mapped as underlain by Andregg family coarse sandy loam. The Andregg family is described as soils having moderate infiltration rates with deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Based on sources searched by EDR, five water wells were mapped within 1 mile of the subject property. One of the five wells was listed as an active raw well; no other well information was available for this location. Four of the five wells were listed as being a part of the USGS California Water Science Center and are discussed below.

The depth to groundwater in one well located 1/8 to 1/4 mile south-southwest of the subject property at a lower elevation was reportedly 2.91 feet below ground surface (bgs) in 1982. The depth to groundwater in two wells located 1/2 to 1 mile, southwest and west-southwest of the subject property at a lower elevation was reportedly 6.93 feet bgs in 1982 and 5.53 feet bgs in 1982, respectively. One well located 1/2 to 1 mile east-northeast of the subject property at a higher elevation had no groundwater level data available. According to GeoTracker, the groundwater flow direction at a site located approximately 1 mile west of the subject property was to the southeast in 2009.

The California Division of Oil, Gas, and Geothermal Resources online database was reviewed for wells on/near the subject property. According to this database, which shows all known oil and gas wells in the state, no oil, gas, or geothermal wells are/were located on the subject property or within a 5-mile radius of the subject property.

The National Pipeline Mapping System online database was reviewed for pipelines on/near the subject property. According to this database, which shows all known gas transmission pipelines and hazardous liquid pipelines, one gas transmission pipeline was located on the northern boundary of the subject property; the pipeline runs along Rocklin Road. It reportedly contains natural gas and is managed my Pacific Gas & Electric Company.

5 INTERVIEWS

5.1 Site Representative Interview

Sid Paul, owner representative of the subject property, completed a Property Background Information Questionnaire for the subject property (Appendix C). Below is a summary of his responses.

Mr. Paul stated that the subject property has been vacant for the past several years.

Mr. Paul stated a previous environmental assessment was conducted at the subject property by GRS Group on October 11, 2013 (the previous assessment is discussed in Section 9.1.)

Mr. Paul stated that a notice of intent/general permit to discharge storm water (WDID No. 5S31C373490) was obtained for the property.

Mr. Paul stated an affiliated entity owns the multifamily property known as Rocklin Manor Apartments. Rocklin Manor Apartments borders the eastern boundary of the subject property.

5.2 User-Provided Information

In accordance with ASTM Standard E 1527-13, to qualify for one of the *Landowner Liability Protections* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the user must provide the following information (if available) to the environmental professional. Dudek sent the following questions to Sid Paul, owner representative, and received the following responses:

1. **Question**: Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

Response: No.

2. **Question**: Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

Response: No.

3. **Question**: As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Response: An affiliated entity owns the multifamily property known as Rocklin Manor Apartments, adjacent to the subject.

4. **Question**: Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Response: We believe the purchase price of the property reasonably reflects the fair market value of similar undeveloped properties.

5. **Question**: Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user, a) Do you know the past uses of the property, b) do you know of specific chemicals that are present or once were present at the property, c) do you know of spills or other chemical releases that have taken place at the property, d) or do you know of any environmental cleanups that have taken place at the property?

Response: a) No. b) No. c) No. d) No.

6. **Question**: As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Response: No.

5.3 Agency Interviews

5.3.1 Placer County Environmental Health – Hazardous Materials Division

Dudek contacted the Placer County Environmental Health Department Hazardous Materials Division, which acts as the county's Certified Unified Program Agency (CUPA), to obtain information about potential spills, tanks, or chemical use on the subject property. The CUPA responded in an email dated November 25, 2015 that no records exist for the subject property (Appendix D).

5.3.2 Central Valley Regional Water Quality Control Board

Dudek contacted the Central Valley Regional Water Quality Control Board (RWQCB) to obtain records of spills, tanks, or other releases that may have impacted the environmental conditions on the subject property. As of the date of this report, the RWQCB has not responded to the request

for records. Dudek did look up the subject property on GeoTracker, the RWQCB's online database; no records were found for the subject property.

5.3.3 City of Rocklin Building Division

Dudek contacted the City of Rocklin Building Division to obtain records about building permits and code violations for the subject property. A permit search was conducted on the City of Rocklin's website, on November 30, 2015. The search results showed that several permits were applied for in 2007 for constructing a building on APN 045-161-016, but none were ever approved. In October 9, 2014 a sign for a gas station was approved on APN 045-161-016.

5.3.4 City of Rocklin Department of Public Works

Dudek contacted the City of Rocklin Department of Public Works (DPW) to obtain records about permits that may be available for the subject property. As of the date of this report, the DPW has not responded to the request for records.

6 SITE RECONNAISSANCE

A site reconnaissance of the subject property was conducted on November 7, 2015, by Keith Blackmon of Dudek. The site reconnaissance consisted of walking the subject property, recording observations, and taking photographs. Photographs are presented in Appendix E.

The subject property is currently vacant, undeveloped land moderately covered with various trees and other plants (Photograph 1). Tags were attached to the majority of the trees on the subject property (Photograph 2).

The subject property is accessed via two breaks in the chain link fence. One break is located at the southeast end of the subject property while the other break in the chain link fence is located at the northwest end along Rocklin Road (Photographs 3 and 4). The subject property is bound to the south by Water Lily Lane and a cinder block wall then residential properties (Photographs 5 and 6). The subject property is bounded to the east by Rocklin Manor Drive followed by an apartment complex (Photograph 7). The subject property is bound to the north by Rocklin Road followed by a vacant lot (Photograph 8). The subject property is bounded to the west by Sierra College Boulevard followed by Granite Creek Apartments and a shopping center (Photograph 9).

The subject property slopes toward the west-southwest, toward Sierra College Boulevard. The subject property consists of northeast-southwest undulating terrain in the northern portion of the subject property with one wash located near the center of the subject property. This wash appeared to run along the center of the subject property to the western boundary of the subject property, towards Sierra College Boulevard. (Photograph 10). The highest point appears to be near the center of the property.

Orange flags marked "Buried Cables" indicate the presence of buried cables that run along the north boundary. PG&E underground electrical is present along the western boundary (Photographs 11 and 12).

One sewer manhole and one drainage manhole were observed along the southeastern boundary of the subject property (Photograph 13). The sewer and drainage lines were marked out with green and blue flags and ran along the southern boundary, east to west (Photographs 14 and 15).

One culvert outlet was observed along the western boundary of the subject property, located under the fence line and extending under Sierra College Boulevard (Photograph 10).

A small section of the subject property near the eastern boundary towards the south appears to have been used for target practice. Several shot-up beer cans were observed in the trees (Photograph 16). Also, several plates were observed in the trees and were broken from being used for target practice (Photograph 17). This area was approximately 15' x 15'.

Wetlands and Natural Waterways

A dry wash was observed on the subject property. The dry wash ran along the center of the subject property from northeast to the west-southwest boundary of the subject property (Photograph 10).

Surface Water Discharge

Surface water on the subject property would drain toward the west-southwest toward Sierra College Boulevard.

Distressed Vegetation

No distressed vegetation was observed on the subject property.

Indications of Solid Debris Storage

No indications of solid debris storage were observed on the subject property.

Chemical Storage or Use

Chemical use or storage was not observed on the subject property.

Unnaturally Colored Water

No unnaturally discolored pools or flowing water were observed on the subject property.

Groundwater Wells, Cisterns, Cesspools, or Septic Tanks

No groundwater wells, cisterns, cesspools, or septic tanks were observed on the subject property.

Sumps or Ponds

No sumps were observed on the subject property.

Transformers

No transformers were observed on the subject property.

DUDEK

Abnormal Odor

No abnormal odors were noted on the subject property.

Soil Disturbances

A few animal burrows were observed on the subject property.

Storage Tanks

No evidence of aboveground or underground storage tanks were observed on the subject property during the site reconnaissance.

7 REVIEW OF HISTORICAL AERIAL PHOTOGRAPHS

Dudek reviewed historical aerial photographs from EDR for 1938, 1952, 1957, 1966, 1972, 1984, 1993, 1999, 2005, 2009, 2010, 2012 (Appendix F). The photographs provided background information to assess the possibility of past activities that could present environmental concerns.

The aerial photographs are described in the following table:

Date	Description
1938	The subject property appears to be undeveloped land with a north-south trending dirt road along the western half of the subject property. Numerous trees are present on the subject property with a large grassy area towards the southeast. Rocklin Road appears to be paved and borders the northern boundary of the subject property. Sierra College Boulevard appears to be paved and is visible northeast of the subject property. The surrounding properties directly west, east and south appear to also be undeveloped land with trees and grassy areas. Further to the west, southwest, and north appears to be agricultural land. Several small structures are present west of the subject property.
1952	A dirt path appears to cut through the southeast portion of the subject property. A northeast-southwest trending dirt path is visible on the northeastern portion of the subject property. A clearing of trees is visible in the northwest portion of the subject property. A large section of land northwest of the subject property no longer appears to be agricultural land.
1957	The dirt path in the northeastern portion of the subject property is no longer visible. The surrounding properties appear to be similar to the 1952 photograph.
1966	A small structure is visible in the northwest portion of the subject property. Sierra College Boulevard now intersects Rocklin Road and borders the western boundary of the subject property. Several buildings, a baseball diamond, and a track and field, which make up Sierra College, are visible northwest of the subject property. Several small buildings are visible directly north of the subject property where agricultural land used to be present. More buildings are visible west of the subject property.
1972	The dirt path in the southeastern portion of the subject property is no longer visible. The surrounding properties appear to be similar to the 1966 photograph.
1984	The small structure that was present in the northwest portion of the subject property is no longer visible. A parking lot is visible northwest of the subject property south of the baseball diamond.
1993	An east-west trending dirt road is visible along the southern boundary and cutting through a small portion of the subject property. A shopping center is visible west of the subject property on the southwest corner of Rocklin Road and Sierra Boulevard. An apartment complex is located directly east of the subject property. Residential housing is present southwest of the subject property, on the western side of Sierra Boulevard.
1999	The subject property appears to be similar to the 1993 photograph. A housing development is present west of the shopping center. A housing development is being constructed south of the subject property.
2005	The subject property appears to be similar to the 1999 photograph. A housing development is being constructed directly south of the subject property. Residential housing is present west of the subject property along the western side of Sierra Boulevard. The track and field is no longer visible northwest of the subject property; it appears to be graded land.
2009	The east-west trending dirt road is now a paved road and connects to a housing development directly south of the subject property. A football field and parking lot have been completed northwest of the subject property.
2010 and 2012	The subject property and surrounding properties appear to be similar to the 2009 photograph.

8 **REVIEW OF HISTORICAL TOPOGRAPHIC MAPS**

Dudek reviewed historical topographic maps from 1891, 1892, 1893, 1944, 1954, 1967, 1981, and 2012 (Appendix G). The topographic maps are a historical source that can be used to document the prior use of the subject property and surrounding area.

Date	Scale	Description
1891	1:125,000	This coarse-scale topographic map indicates that the subject property is located in Rocklin and southeast of a railroad. Secret Ravine appears to be north and south of the subject property; the ravine runs from northeast to southwest. Rocklin Road appears to be a maintained road.
1892 and 1893	1:125,000	The subject property and surrounding properties appear to be similar to the 1891 topographic map.
1944	1: 62,500	Sierra College Boulevard appears to be paved and is visible northwest of the subject property trending north-south and connecting to Rocklin Road. Three dirt roads appear to be branching off of Rocklin Road west of the subject property. A few structures are present along those dirt roads west of the subject property.
1954	1:24,000	A northeast-southwest trending dirt road is visible cuts through the subject property. Agricultural land is present north and northeast of the subject property. Two of the dirt roads branching off of Rocklin Road are now paved. Agricultural land is present southwest of the subject property.
1967	1:24,000	The northeast-southwest trending dirt road is no longer visible on the subject property. Sierra College Boulevard intersects Rocklin Road and borders the subject property to the west. Sierra College campus has been constructed northwest of the subject property. A sewage disposal pond is visible ½ to 1 mile west of the subject property. Highway 80 is visible approximately 1 mile west of the subject property.
1981	1:24,000	The subject property appears to be similar to the 1967 topographic map. Agricultural land north of the subject property is no longer visible.
2012	1:24,000	Several more roads have been developed around the subject property. Water Lily Lane, an east-west trending paved road, is visible along the southern boundary and cutting through a small portion of the subject property.

The topographic maps are described in the following table:

9 SITE HISTORY

Based on review of the historical aerial photographs and topographic maps, agency records, and the site representative interview, the subject property has been primarily undeveloped. A small structure existed in the northwestern portion of the subject property sometime between the early to mid-1960's and early to late 1970's. The subject property is currently undeveloped.

Adjacent properties have consisted of undeveloped land, residential housing, and roadways.

Historical Sanborn fire insurance maps were requested from EDR. Sanborn maps provide information regarding the historical uses of the subject property and surrounding properties. Sanborn maps typically exist for cities with populations of 2,000 or more; the coverage is dependent on the location of the subject site within the city limits. The Sanborn Map Report lists the subject property as an unmapped property; no additional information was included in the report (Appendix H).

City Directory listings were requested from EDR (Appendix I). No listings matching the physical address were identified for the subject property.

9.1 **Previous Investigations**

A previous ESA Phase I has been conducted on the subject property by GRS group on October 11, 2013.

GRS concluded no REC's were identified as a result of onsite and off-site activities or conditions.

9.2 Vapor Encroachment Screening

A vapor encroachment screen report was prepared using EDR's vapor encroachment worksheet (Appendix J). A "Tier I" Vapor Encroachment Screening (VES) was performed for the Site in accordance with ASTM E 2600-10 "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions." The Tier I VES was performed to evaluate whether there is a potential for vapors originating from contaminated soil and/or groundwater to occur in the subsurface below the existing and potential future on-site structures. For sites where a vapor encroachment condition (VEC) could not be ruled out but where reports of site sampling were available, those reports were used to evaluate the site (Tier 2 screening).

The EDR vapor encroachment worksheet evaluated types of soils, geology, and hydrology as well as listed contaminated sites as identified in Federal, State, and local databases. The following table presents a summary of the VEC findings:

Phase I Environmental Site Assessment Rocklin Road/Sierra College Boulevard

Potential for Vapor Intrusion on Site				
Areas of Concern	Conclusion			
Site (existing conditions)	VEC can be ruled out.			
Site (former condition)	VEC can be ruled out.			
Adjoining Property or near-by Property Operations or Existing Conditions	VEC can be ruled out.			
Historical Uses of Adjoining Property or Near-by Properties	VEC can be ruled out.			
Regulatory Review of sites identified on Federal, State, and Local databases	VEC can be ruled out.			

Based on this screening, VEC can be ruled out for the subject property (Appendix J).

10 PUBLIC AGENCY RECORDS SEARCH REVIEW

A regulatory database search gives a listing of sites within a 1-mile radius of the subject property ("target property" is the term used by EDR) that are known to be chemical handlers, hazardous waste generators, or polluters. Information in these listings includes the location of the site relative to the property, sources of pollution, and the status of the site. The search performed for this ESA was conducted in November 2015 by EDR. The database search report is included in Appendix B.

The subject property was not listed in any of the regulatory databases searched by EDR.

Three sites, one with duplicate entries, were identified in the database search. The following sections list the databases that were searched and search distances from the subject property.

10.1 U.S. Environmental Protection Agency Federal Sources

Acronym	Database	Search Distance	Subject Property Listed?	Number of Sites Listed
NPL	National Priorities List (including proposed NPL sites)	1 mile	No	0
Proposed NPL	Proposed National Priority List Sites	1 mile	No	0
Delisted NPL	National Priority List Deletions	1 mile	No	0

The subject property was not listed in state or local regulatory database records. Three unique sites within the specified search areas were identified in the EDR report. The three sites are discussed below.

Stonebrook Estates, located <1/8 mile west of the subject property, is listed in the ENVIROSTOR database. Stonebrook Estates received a letter regarding analytical results from soil testing and removal prior to subdivision development of the site. Results presented in a March 1990 letter indicated that soil in the area of an old barn that had previously tested positive for dichlorodiphenytrichloroethane (DDT) and other pesticides had been removed. Based on the nature of pesticides (not mobile) it is unlikely that this site has impacted the environmental conditions at the subject property.

5060 Rocklin Road, located in the adjacent shopping center, approximately 130 feet west of the subject property, is listed in the EDR US Hist Cleaners database. This database indicates that a dry cleaner used to operate at this site. Fast Cleaners operated on site from 2002-2003, and Valis Alterations & Cleaners operated on site from 2010-2012. This site is currently occupied by Zaytoon Market. As there is no known release at this site, it is unlikely that this site has impacted the environmental conditions at the subject property.

Sierra Community College, located 1/8 to 1/4 miles northwest of the subject property, is listed in ten different databases. Nine of the ten databases are not indicative of releases. Sierra Community College is also listed in the LUST database. A release of waste oil to the soil was discovered in 1988. A no further action letter was received in 1996. Due to the affected medium only being soil; it is unlikely that this site has impacted the environmental conditions at the subject property.

10.3 EDR Proprietary Historical Databases

The Site was not listed in the EDR proprietary databases searched.

10.4 Unmapped Sites

Unmapped sites are flagged by EDR but not mapped due to insufficient address information. They are usually included in the database search report because they are in the same zip code as the subject property. Three unmapped sites were listed in the EDR report. All three sites were located over 2 miles from the subject property, and are therefore unlikely to have impacted the environmental conditions at the subject property.

INTENTIONALLY LEFT BLANK

11 POTENTIAL HAZARDS AND ENVIRONMENTAL CONCERNS

Information regarding the following potential sources of hazards and hazardous material releases was obtained from the interview, site reconnaissance, and review of regulatory agency records.

Agricultural Use

Based on a review of historical aerial photographs, the subject property has not been used for agriculture.

Off-Site Sources

Based on the review of regulatory agency records, it is unlikely that off-site sources have impacted the environmental conditions of the subject property.

Residential Use

Based on a review of historical aerial photographs and site reconnaissance, the subject property was unlikely used for residential purposes from 1938 to the date of this report. The subject property is currently vacant, undeveloped land.

PCB Items

No transformers were observed on the subject property.

Fill Material

No fill material was observed on the subject property.

Debris

Small amounts of debris in the form of bottles, signs, and plates were observed at various locations on the subject property.

Tanks

No evidence of aboveground or underground storage tanks was observed on the subject property during the site reconnaissance.

Radon

The EDR report presents radon test results for the vicinity of the subject property. Nine sites within zip code 95677 for Rocklin were evaluated. The radon concentrations at each of the nine sites were below 4 pico curies per liter (pCi/L), with an average of 0.567 pCi/L. The Federal EPA Radon Zone for Placer County is 2, which corresponds with indoor average radon levels of ≥ 2 pCi/L and ≤ 4 pCi/L. Therefore, radon does not appear to be an issue for this area.

12 CONCLUSIONS AND RECOMMENDATIONS

The subject property is undeveloped land. Adjacent and nearby properties have included undeveloped land, residential housing, a shopping center, and a college. Based on the records reviewed and visual observations of surrounding properties, it is unlikely that adjacent or surrounding properties have impacted the environmental conditions at the subject property. There is a natural gas transmission pipeline at the northern boundary of the subject property. Appropriate precautions should be taken prior to construction in this area.

Dudek performed this Phase I ESA of the subject property in conformance with the scope and limitations of ASTM Practice E1527-13. This assessment revealed no evidence of RECs in connection with the subject property.

INTENTIONALLY LEFT BLANK

13 DATA GAPS

As discussed in Section 5.3, records were requested from several local public agencies. As of the date of this report, a response had not been received from the City of Rocklin Department of Public Works or Central Valley Regional Water Quality Control Board. These data gaps are not likely to be significant; however, if records are received from these agencies that affect the material findings of this report, Dudek will prepare a letter addendum summarizing the information and potential impacts.

INTENTIONALLY LEFT BLANK

14 LIMITATIONS

The findings and conclusions presented in this report are professional opinions based solely on the indicated data described in this report, visual observations of the subject property and vicinity, and our interpretation of the available historical information and documents reviewed. Dudek makes no warranty as to the accuracy of statements made by others or the accuracy of information included in documentation reviewed in connection with this study. This study was not intended to be a definitive investigation of potential contamination at the subject property, and the recommendations do not necessarily include all conditions that may be present. Because the scope of the investigation was limited, it is possible that currently unrecognized conditions or contamination might exist at the subject property.

No warranties or guarantees or representations, expressed or implied, are made by Dudek, except that this report has been prepared in accordance with current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professionals performing the same or similar services. The conclusions are intended exclusively for the purpose outlined herein, and may not be suitable to satisfy the needs of other users. Thus, any use or reuse of this document is at the sole risk of said user.

In accordance with ASTM Standard E 1527-13, this Phase I ESA is valid for 180 days. After 180 days, this report, or the information presented in this report must be updated in accordance with the ASTM Standard.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in *bold italics* are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/09/2015 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
SIERRA COMMUNITY COL	5000 ROCKLIN ROAD	WNW 1/8 - 1/4 (0.192 mi.)	A4	9

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 08/03/2015 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there is 1 EDR US Hist Cleaners site within approximately 0.125 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

	Completed Info: Completed Area Name: Completed Sub Area Name: Completed Document Type: Completed Date: Comments:	PROJECT WIDE Not reported * Discovery 03/28/1991 Facility Identified: Received letter regarding analytical results from soil testing & removal prior to subdivision development of property. Placer County Health had no involvement with the remedial work. Site Screening Done: Placer County Assessor Office indicates that the parcel is subdivided for residential development. Results presented in a March 1990 letter indicate that soil in the area of an old barn that had previously tested positive for DDT & other pesticides had been removed. Control area samples showed 2.7 parts per million DDT. Low-priority Preliminary Endangerment Assessment recommended.

Environmental Interest/Information System AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA Air Quality System (AQS) contains ambient air pollution data collected by EPA, State, Local, and Tribal air pollution control agencies from thousands of monitoring stations.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/26/2015 Date Data Arrived at EDR: 04/08/2015 Date Made Active in Reports: 06/22/2015 Number of Days to Update: 75 Source: EPA Telephone: N/A Last EDR Contact: 07/09/2015 Next Scheduled EDR Contact: 10/19/2015 Data Release Frequency: Quarterly

EPA Region 10 Telephone 206-553-8665

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/26/2015 Date Data Arrived at EDR: 04/08/2015 Date Made Active in Reports: 06/22/2015 Number of Days to Update: 75 Source: EPA Telephone: N/A Last EDR Contact: 07/09/2015 Next Scheduled EDR Contact: 10/19/2015 Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/08/2015	Telephone: 703-603-8704
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 07/10/2015

	Data Release Frequency: Varies

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013 Date Data Arrived at EDR: 11/11/2013 Date Made Active in Reports: 02/13/2014 Number of Days to Update: 94 Source: EPA Telephone: 703-412-9810 Last EDR Contact: 05/29/2015 Next Scheduled EDR Contact: 09/07/2015 Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013 Date Data Arrived at EDR: 11/11/2013 Date Made Active in Reports: 02/13/2014 Number of Days to Update: 94 Source: EPA Telephone: 703-412-9810 Last EDR Contact: 05/29/2015 Next Scheduled EDR Contact: 09/07/2015 Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 06/09/2015 Date Data Arrived at EDR: 06/26/2015 Date Made Active in Reports: 09/16/2015 Number of Days to Update: 82 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 06/26/2015 Next Scheduled EDR Contact: 10/12/2015 Data Release Frequency: Quarterly

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/09/2015 Date Data Arrived at EDR: 06/26/2015 Date Made Active in Reports: 09/16/2015 Number of Days to Update: 82 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 06/26/2015 Next Scheduled EDR Contact: 10/12/2015 Data Release Frequency: Quarterly

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/09/2015 Date Data Arrived at EDR: 06/26/2015 Date Made Active in Reports: 09/16/2015 Number of Days to Update: 82 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 06/26/2015 Next Scheduled EDR Contact: 10/12/2015 Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/09/2015 Date Data Arrived at EDR: 06/26/2015 Date Made Active in Reports: 09/16/2015 Number of Days to Update: 82 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 06/26/2015 Next Scheduled EDR Contact: 10/12/2015 Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/09/2015 Date Data Arrived at EDR: 06/26/2015 Date Made Active in Reports: 09/16/2015 Number of Days to Update: 82 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 06/26/2015 Next Scheduled EDR Contact: 10/12/2015 Data Release Frequency: Varies

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 09/10/2015 Date Data Arrived at EDR: 09/11/2015 Date Made Active in Reports: 11/03/2015 Number of Days to Update: 53 Source: Environmental Protection Agency Telephone: 703-603-0695 Last EDR Contact: 08/31/2015 Next Scheduled EDR Contact: 12/14/2015 Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 09/10/2015 Date Data Arrived at EDR: 09/11/2015 Date Made Active in Reports: 11/03/2015 Number of Days to Update: 53 Source: Environmental Protection Agency Telephone: 703-603-0695 Last EDR Contact: 08/31/2015 Next Scheduled EDR Contact: 12/14/2015 Data Release Frequency: Varies

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

INDIAN VCP R7: Voluntary Cleanup Priority Lisitng

A listing of voluntary cleanup priority sites located on Indian Land located in Region 7.

Date of Government Version: 03/20/2008 Date Data Arrived at EDR: 04/22/2008 Date Made Active in Reports: 05/19/2008 Number of Days to Update: 27 Source: EPA, Region 7 Telephone: 913-551-7365 Last EDR Contact: 04/20/2009 Next Scheduled EDR Contact: 07/20/2009 Data Release Frequency: Varies

State and tribal Brownfields sites

BROWNFIELDS: Considered Brownfieds Sites Listing

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 06/25/2015 Date Data Arrived at EDR: 09/08/2015 Date Made Active in Reports: 10/12/2015 Number of Days to Update: 34 Source: State Water Resources Control Board Telephone: 916-323-7905 Last EDR Contact: 09/08/2015 Next Scheduled EDR Contact: 12/21/2015 Data Release Frequency: Varies

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs. Date of Government Version: 06/22/2015 Date Data Arrived at EDR: 06/24/2015 Date Made Active in Reports: 09/02/2015 Number of Days to Update: 70 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 06/24/2015 Next Scheduled EDR Contact: 10/05/2015 Data Release Frequency: Semi-Annually

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT: Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 09/01/2015 Date Data Arrived at EDR: 09/03/2015 Date Made Active in Reports: 11/03/2015 Number of Days to Update: 61 Source: Environmental Protection Agency Telephone: 202-566-1917 Last EDR Contact: 08/12/2015 Next Scheduled EDR Contact: 11/30/2015 Data Release Frequency: Quarterly

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 08/04/2015 Next Scheduled EDR Contact: 11/23/2015 Data Release Frequency: Quarterly

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 04/22/2013 Date Data Arrived at EDR: 03/03/2015 Date Made Active in Reports: 03/09/2015 Number of Days to Update: 6 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 05/14/2015 Next Scheduled EDR Contact: 08/24/2015 Data Release Frequency: Varies

TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2012 Date Data Arrived at EDR: 01/15/2015 Date Made Active in Reports: 01/29/2015 Number of Days to Update: 14 Source: EPA Telephone: 202-260-5521 Last EDR Contact: 06/25/2015 Next Scheduled EDR Contact: 10/05/2015 Data Release Frequency: Every 4 Years

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2013 Date Data Arrived at EDR: 02/12/2015 Date Made Active in Reports: 06/02/2015 Number of Days to Update: 110 Source: EPA Telephone: 202-566-0250 Last EDR Contact: 01/29/2015 Next Scheduled EDR Contact: 06/08/2015 Data Release Frequency: Annually

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009 Date Data Arrived at EDR: 12/10/2010 Date Made Active in Reports: 02/25/2011 Number of Days to Update: 77 Source: EPA Telephone: 202-564-4203 Last EDR Contact: 07/22/2015 Next Scheduled EDR Contact: 11/09/2015 Data Release Frequency: Annually

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995 Number of Days to Update: 35 Source: EPA Telephone: 202-564-4104 Last EDR Contact: 06/02/2008 Next Scheduled EDR Contact: 09/01/2008 Data Release Frequency: No Update Planned

PRP: Potentially Responsible Parties

A listing of verified Potentially Responsible Parties

RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/07/2015 Date Data Arrived at EDR: 07/09/2015 Date Made Active in Reports: 09/16/2015 Number of Days to Update: 69 Source: Environmental Protection Agency Telephone: 202-343-9775 Last EDR Contact: 07/09/2015 Next Scheduled EDR Contact: 10/19/2015 Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007 Number of Days to Update: 40

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Financial Assurance 2: Financial Assurance Information Listing

A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Date of Government Version: 08/17/2015 Date Data Arrived at EDR: 08/18/2015 Date Made Active in Reports: 09/03/2015 Number of Days to Update: 16 Source: California Integrated Waste Management Board Telephone: 916-341-6066 Last EDR Contact: 08/14/2015 Next Scheduled EDR Contact: 11/30/2015 Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST:	Hazardous Waste Manifest Data
—	

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013 Date Data Arrived at EDR: 08/19/2013 Date Made Active in Reports: 10/03/2013 Number of Days to Update: 45	Source: Department of Energy & Environmental Protection Telephone: 860-424-3375 Last EDR Contact: 05/18/2015 Next Scheduled EDR Contact: 08/31/2015 Data Release Frequency: No Update Planned

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

ROCKLIN MANOR APARTMENTS ROCKLIN ROAD/SIERRA COLLEGE BOULEVARD ROCKLIN, CA 95677

TARGET PROPERTY COORDINATES

Latitude (North):	38.7876 - 38° 47' 15.36"
Longitude (West):	121.2048 - 121° 12' 17.28"
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	655922.8
UTM Y (Meters):	4294529.5
Elevation:	346 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5629068 ROCKLIN, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County PLACER, CA	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	0602420010C - FEMA Q3 Flood data
Additional Panels in search area:	0602390418D - FEMA Q3 Flood data 0602420005C - FEMA Q3 Flood data 0602390414D - FEMA Q3 Flood data 0602390477C - FEMA Q3 Flood data 0602390481D - FEMA Q3 Flood data
NATIONAL WETLAND INVENTORY	
NWI Quad at Target Property ROCKLIN	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:				
Search Radius:	1.25 miles			
Status:	Not found			

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1	
Soil Component Name:	ANDREGG
Soil Surface Texture:	coarse sandy loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Well drained
Hydric Status: Partially hydric	
Corrosion Potential - Uncoated Steel:	Moderate
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

	Soil Layer Information							
	Βοι	Indary		Classification		Saturated hydraulic		
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)	
1	0 inches	14 inches	coarse sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 5.6	
2	14 inches	29 inches	coarse sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 6.5 Min: 5.6	
3	29 inches	33 inches	weathered bedrock	Not reported	Not reported	Max: 0.42 Min: 0	Max: Min:	

Soil Map ID: 2

Soil Component Name:	XERORTHENTS
Soil Surface Texture:	variable
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Well drained
Hydric Status: Not hydric	
Corrosion Potential - Uncoated Steel:	Moderate
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

	Soil Layer Information								
Boundary Classification Saturated hydraulic									
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		Soil Reaction (pH)		
1	0 inches	59 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:		

Soil Map ID: 3	
Soil Component Name:	Xerofluvents
Soil Surface Texture:	stratified loamy sand to fine sandy loam
Hydrologic Group:	Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class:	Somewhat poorly drained
Hydric Status: All hydric	
Corrosion Potential - Uncoated Steel:	High
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 111 inches

	Soil Layer Information								
	Boundary			Classi	fication	Saturated hydraulic			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Fish & Game

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS) This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database Source: Department of Water Resources Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations Source: Department of Conservation Telephone: 916-323-1779 Oil and Gas well locations in the state.

RADON

State Database: CA Radon Source: Department of Health Services Telephone: 916-324-2208 Radon Database for California

Area Radon Information

Source: USGS Telephone: 703-356-4020 The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones Source: EPA Telephone: 703-356-4020 Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

APPENDIX C

Site Representative Interview

PLEASE GIVE FURTHER DETAILS FOR ALL "YES" ANSWERS.

1. Describe the current uses of the Property. How long has the property been used for these purposes, and how long have you occupied the Property?

The property is currently vacant. The property appears to have been vacant for the past several years.

2. Describe the past uses, owners, and operators of the Property.

We purchased the property from Richard and Melba Resch. The property has been vacant for as long as we have seen.

3. Have the Property or adjoining properties been used for industrial activities including the following? (Please note that an adjoining property is a property that is next to your Property, even if it is across the street).

Gasoline Station	🗌 Yes	✓ No
Printing Facility	Yes	✓ No
Metal Plating Manufacturing	Yes	✓ No
Landfill	🗌 Yes	🔲 No Unknown
Motor Repair Facility	Yes	🔽 No
Dry Cleaners	Yes	🔽 No
Junkyard	Yes	✓ No
Waste Treatment	Yes	✓ No
Storage, Disposal, or Recycling Facility	Yes	🔲 No Unknown

Describe other industrial activities, if any.

4. Have any hazardous substances, petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or other waste materials been dumped above ground, buried, or burned on the Property? Yes No Unknown

If yes, please describe.

5. Have any of the following items been stored on the Property in containers greater than 5 gallons?

Paint	🗌 Yes 🔽 No	Unknown
Chemicals	🗌 Yes 🔽 No	
Pesticides	🗌 Yes 🚺 No	

6. Have hazardous substances or petroleum products been stored on the Property or transferred across the Property in pipelines, either above or below ground?

Yes No 🗸 Unknown

7. Have 55-gallon drums or sacks of chemicals been stored on the Property?

☐ Yes ☐ No 🗸 Unknown

8. Has fill dirt been brought onto the property from an offsite source?

☐ Yes ☐ No 🖌 Unknown If Yes, Source of Fill_____

9. Is there evidence that the fill dirt in Question 8 may be contaminated?

Yes No 🖌 Unknown Please provide soil sampling data, if available.

10. Are there currently any pits, ponds, or lagoons on the Property?

☐ Yes ☐ No 🗸 Unknown

11. Have any pits, ponds, or lagoons previously existed on the Property?

☐ Yes ☐ No 🖌 Unknown

12. Are there currently areas on the Property with stained soil?

🗌 Yes 🗌 No 🔽 Unknown

13. Have stained soils previously existed on the property?

Yes No 🗸 Unknown

14. Do underground or above-ground storage tanks exist, or have they existed previously on the Property?

🗌 Yes 🗋 No 🗹 Unknown

15. Do fill pipes, vent pipes, or access ways indicating the presence of underground storage tanks exist on the Property?

☐ Yes ☐ No 🖌 Unknown

16. Have fill pipes or vent pipes which may indicate the presence of an underground storage tank been removed from the Property?

Yes No 🗸 Unknown

17. Are floor drains stained with anything other than water in any area on the Property?

☐ Yes ☐ No 🗸 Unknown

18. Do floor drains on the Property emit foul odors?

🗌 Yes 🗌 No 🔽 Unknown

19. Is the Property served by private well or non-public water source?

Yes 🖌 No 🗌 Unknown

20. Are contaminants known to exist in any private well or non-public water system serving the Property?

☐ Yes ☐ No 🖌 Unknown

21. Does the Property discharge wastewater, other than domestic wastewater or storm water, into the sewer?

🗌 Yes 🗹 No 🗌 Unknown

22. Other than permission for domestic hookup, have any city, county, or local permits for wastewater discharge been issued to the Property?

Yes No Unknown A Notice of Intent/General Permit to Discharge Storm Water (WDID No. 5S31C373490) was obtained for the property.

23. Does a septic tank exist, or has one existed previously at the Property?

Yes No 🗸 Unknown

24. Do cesspools or cisterns currently exist on the Property?

Yes No 🗸 Unknown

25. Have cesspools or cisterns previously existed on the Property?

🗌 Yes 🗌 No 🔽 Unknown

26. Other than storm water, does the Property discharge waste water onto the neighboring Property?

☐ Yes ☐ No 🗹 Unknown

27. Is there a transformer or capacitor that may contain PCBs on the Property?

Yes No 🗸 Unknown

28. Is there any hydraulic equipment such as automobile lifts or elevators on the property?

☐ Yes ☐ No 🖌 Unknown

29. Are PCBs contained in hydraulic oil associated with hydraulic equipment located on the Property?

Yes No 🗸 Unknown

30. Has an asbestos and/or lead based paint survey been conducted at the Property?

🗌 Yes 🗌 No 🖌 Unknown

31. Have pesticides, herbicides, or insecticides been applied on the Property?

Yes No 🗸 Unknown If Yes, Describe Type:

32. Are you aware of any environmental liens against the Property that are filed or recorded under federal, tribal, state, or local law?

Yes No 🗸 Unknown

33. Have any environmental violations or citations associated with activities conducted on the Property been issued?
Yes No 🗸 Unknown
34. Has the property been included in other environmental assessments?
Yes No Unknown A Phase 1 ESA was completed by GRS Group on Oct. 11, 2013
35. Have other environmental assessments identified hazardous substances or petroleum products that exist, or may have existed on the Property?
Yes 🖌 No 🗌 Unknown
36. Are there any pending law suits that involve the release or threatened release of hazardous substances associated with the Property?
Yes 🖌 No 🗌 Unknown
37. Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the Property and/or have been filed or recorded in a registry under federal, tribal, state or local law?
Yes 🗸 No 🗌 Unknown
38. Are you aware of any commonly known or reasonably ascertainable information about the Property that would help the environmental professional to identify conditions indicative of releases or threatened releases?
Yes 🗸 No 🗌 Unknown
39. Do you have any specialized knowledge or experience related to the Property or near- by properties, including the knowledge of the chemicals and processes used by this type of business? An affiliated entity owns the multifamily property known as Rocklin
Yes No Unknown Wanor Apartments, adjacent to the subject.

40. Based in your knowledge or experience related to the Property, are there any obvious indicators that point to the presence or likely presence of contamination?

No

Signature

11/18/15

Date

Sid Paul

Name (Printed)

Owner Occupant 🗹 Owner Representative

Property Address: ______SE Corner of Rocklin Rd. and Sierra College Blvd.

ASTM 1527-05 X3. User Questionnaire

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the user must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.

- Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? No
- 2) Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?No
- 3) As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? An affiliated entity owns the multifamily property known as Rocklin Manor Apartments, adjacent to the subject.
- 4) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

We believe the purchase price of the property reasonable reflects the fair market value of similar undeveloped properties.

- 5) Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,
 - a) Do you know the past uses of the property? No
 - b) Do you know of specific chemicals that are present or once were present at the property? No
 - c) Do you know of spills or other chemical releases that have taken place at the property?No
 - d) Do you know of any environmental cleanups that have taken place at the property?No
- 6) As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property? No

Any Hazardous Material associated with the APN for a ESA Phase I

Hi Maryann,

I would like to submit a public records request for the following APN's:

045-161-014

045-161-015

045-161-016

This request is associated with an environmental site assessment phase I. I am interested in any and all records on file for the APN's above.

Attached is a figure with an outline of the three Parcels in question.

Please contact me regarding the status of records, if any, on file for this address.

I can be reached by phone at 760-479-4146 or by email at kblackmon@dudek.com

Thank you.

KEITH BLACKMON GEOLOGIST

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business. Please contact EDR at 1-800-352-0050 with any questions or comments.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Dudek & Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Disclaimer - Copyright and Trademark Notice

The EDR Vapor Encroachment Worksheet enables EDR's customers to make certain online modifications that effects maps, text and calculations contained in this Report. As a result, maps, text and calculations contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. Environmental Data Resources shall not be responsible for any customer's decision to include or not include in any final report any records determined to be within the relevant minimum search distances.

This report contains information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANYSUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES.ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this report "AS IS". Any analyses, estimates, ratings, or risk codes provided in this report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assesment performed by an environmental professional can produce information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2015 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600-10).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name:	ANDREGG
Soil Surface Texture:	coarse sandy loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Well drained
Hydric Status:	Partially hydric
Corrosion Potential - Uncoated Steel:	Moderate
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

			-	<u> </u>		Saturated

STONEBROOK ESTATES, 5760 SCHATZ LANE, ROCKLIN, CA 95677 (Continued)

Comments:	Facility Identified: Received letter regarding analytical results from soil testing & removal prior to subdivision development of
	property. Placer County Health had no involvement with the remedial
	work. Site Screening Done: Placer County Assessor Office indicates
	that the parcel is subdivided for residential development. Results
	presented in a March 1990 letter indicate that soil in the area of an
	old barn that had previously tested positive for DDT & other
	pesticides had been removed. Control area samples showed 2.7 parts
	per million DDT. Low-priority Preliminary Endangerment Assessment
	recommended.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA Air Quality System (AQS) contains ambient air pollution data collected by EPA, State, Local, and Tribal air pollution control agencies from thousands of monitoring stations.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RMP: Risk Management Plans

Standard Environmental Record Source: Other Standard Environmental Records Search Distance: Property

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures for informing the public and response agencies (e.g. the fire department) should an accident occur.

DEED: Deed Restriction Listing

Standard Environmental Record Source: Other Standard Environmental Records Search Distance: 0.333 Mile

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

ENVIROSTOR: EnviroStor Database

Standard Environmental Record Source: State and tribal - equivalent CERCLIS Search Distance: 0.333 Mile

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 08/03/2015 Number of Days to Update: 30 Last EDR Contact :08/04/2015 Source: Department of Toxic Substances Control Telephone: 916-323-3400

HAZNET: Facility and Manifest Data

Standard Environmental Record Source: Other Standard Environmental Records Search Distance: Property

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

2020 COR ACTION: 2020 Corrective Action Program List

Standard Environmental Record Source: Other Standard Environmental Records Search Distance: 0.25 Mile

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 04/22/2013 Number of Days to Update: 6 Last EDR Contact :05/14/2015 Source: Environmental Protection Agency Telephone: 703-308-4044

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System Standard Environmental Record Source: Federal CERCLIS Search Distance: 0.333 Mile

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013 Number of Days to Update: 94 Last EDR Contact :05/29/2015 Source: EPA

Telephone: 703-412-9810

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Standard Environmental Record Source: Other Standard Environmental Records Search Distance: 0.333 Mile

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

EPA WATCH LIST: EPA WATCH LIST

Standard Environmental Record Source: Other Standard Environmental Records Search Distance: Property

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 01/31/2015 Number of Days to Update: 97 Last EDR Contact :09/11/2015 Source: U.S. Army Corps of Engineers Telephone: 202-528-4285

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

Standard Environmental Record Source: Other Standard Environmental Records Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Standard Environmental Record Source: Federal RCRA TSD facilities list

Search Distance: 0.333 Mile

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

UMTRA: Uranium Mill Tailings Sites

Standard Environmental Record Source: Other Standard Environmental Records Search Distance: 0.333 Mile

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

Standard Environmental Record Source: Other Standard Environmental Records Search Distance: Property

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

US BROWNFIELDS: A Listing of Brownfields Sites

Standard Environmental Record Source: Other Standard Environmental Records Search Distance: 0.333 Mile

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

Standard Environmental Record Source: Other Standard Environmental Records Search Distance: Property

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EDR MGP: EDR Proprietary Manufactured Gas Plants

Standard Environmental Record Source: Former manufactured Gas Plants

Search Distance: 0.333 Mile

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: 08/28/2009 Number of Days to Update: 55 Last EDR Contact :11/30/2012 Source: EDR, Inc. Telephone: Not Reported

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

Standard Environmental Record Source: Historical Gas Stations Search Distance: 0.25 Mile

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: 02/20/2007 Number of Days to Update: 42 Last EDR Contact :02/21/2007 Source: EDR, Inc.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW[®] Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW[®] Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
