## SWIMMING POOL SAFETY REQUIRED UPGRADES (EFFECTIVE 01/01/2008)

- TO: All Single Family Residential Remodel and Modification Permit Applicants
- FM: Pete Guisasola, Chief Building and Code Compliance Official
- RE: Correction of Pool & Spa Hazards; California Health and Safety Code Section 115928 (see reverse)
- DT: January 01, 2008

To eliminate safety hazards on existing pools and spas, California Health and Safety Code Section 115928 requires installations of **pool anti-entrapment covers** whenever a building permit is issued for the remodel or modification of an existing swimming pool, toddler pool, or spa at a single family home. The permit shall require that the suction outlet of the existing swimming pool, toddler pool, or spa be upgraded so as to be equipped with an anti-entrapment cover meeting current standards of the American Society for Testing and Materials (ASTM) or the American Society of Mechanical Engineers (ASME). It is important to obtain the correct cover for your pool or spa and to verify the cover is properly installed.

## **DECLARATION**

The property located at	t			has: (Check all that apply.)
a swimming pool	🗖 a spa	a wading/toddler pool	does not have a swimming pool, spa	, or wading/toddler pool

If there is an existing swimming pool, spa, or wading/toddler pool, I understand that a pool anti-entrapment device is required at the above address in conjunction with my permit. I also understand that if a pool anti-entrapment device is required, the completed Installation Certification below must be received by the building inspector at final inspection. Please note that permits cannot receive final inspection approval without this certification.

## Under penalty of perjury, I acknowledge that I have read and understand the requirements of AB 2977 and that the above is true and correct.
